

## POSEIDON

### Poseidon for a fresh breeze

Salt module for the sauna and  
the infrared cabinet

Wellness Innovation Prize 2012.  
Category "Wellness at Home".

## Fits into any sauna and any infrared cabinet

Poseidon: flat module out of rose salt and in a frame of hemlock wood

### Almost like a day at the sea

Imagine that you're going for a walk on the North Sea shore after a summer rain. That's how the air is after an infusion in the sauna with the Poseidon salt module. You smell the salt in the air, feel the liberating effect with every breath and feel the salt on your skin. That is a pure sense of well-being.

### Large salt surface for a deep effect

The salt encourages a pleasant indoor atmosphere; it binds odours, has an antibacterial effect and purifies the air. The frame of the Poseidon salt plate is made of hemlock sauna wood without using any glue or resin. The best thing to do is to mount the salt plate near the sauna stove. The distance to the wall is one centimetre. This distance enables the complete surface to interact with the ambient air. A salt surface has a effect of over 1 m<sup>2</sup> with a plate measuring 85 x 70 cm. The Poseidon salt plate is also a great success in the infrared cabinet!

### Salt Relax® - fine products for wellness and living

Salt Relax® offers you salt walls and specially designed salt lamps for therapy and office rooms, for the sauna, infrared cabinet and the entire house. Treat yourself and your guests to the soothing atmosphere and the warm, orange-coloured light of the salt lamps from our Salt Relax® manufactory.

### Quality tested

We use exclusively high-grade, tested components. The products are made in a German manufactory and prepared with great care in their workmanship.

### Material and measurements

The Poseidon module measures 85 x 70 cm with 3 x 8 salt slabs. 24 kg of rose salt take effect in this amount. The frame is made of hemlock wood without glue or resin.

You can also have a Poseidon out of 1 x 10 salt slabs measuring 24.5 x 105 cm. The product can be specially equipped with a high quality LED lamp for the infrared cabinet.

### Special models on request

The Poseidon salt wall is manufactured in a lightweight design and can be expanded as desired. Construction, remodelling, expansion and dismantling can be undertaken quickly and cleanly alongside running operations. We shall be pleased to construct special dimensions and designs for you, and to offer detailed consultation concerning our products.
